

TARUN M

SOC Analyst | Cyber Security Analyst

Bangalore | tarunmk03@gmail.com | 6384991267 | linkedin.com/in/tarun-mk-03-/ | github.com/tarunmk03

PROFESSIONAL SUMMARY

Entry-level SOC Analyst and Cyber Security Analyst with 6+ months of hands-on experience in SOC workflows, SIEM monitoring, log analysis, incident response, threat hunting, and vulnerability assessment. Skilled in VAPT, network security, and web application security. Strong communicator with a proven ability to document findings, collaborate with teams, and deliver clear remediation reports.

TECHNICAL SKILLS

- SOC Operations | SIEM Monitoring (Splunk)
- Log Analysis | Incident Response
- Threat Hunting | Threat Monitoring
- Vulnerability Assessment | VAPT / Penetration Testing
- Security Automation Concepts | Network Security / TCP/IP
- Web Application Security | SQL Injection / XSS
- MITRE ATT&CK Framework | IDS / IPS
- Wireshark / Nmap | Linux

WORK EXPERIENCE

Cyber Security Trainee

Nov 2025 - May 2026

Gatewaypark Business Pvt Ltd, Bengaluru

- Monitored and triaged 50+ security alerts daily using SIEM workflows; escalated critical incidents following SOC runbooks, reducing response time by 20%.
- Conducted log analysis across network and endpoint sources, applying incident response procedures to identify and document 15+ potential security events.
- Performed VAPT on 10+ internal systems; identified and reported critical vulnerabilities with detailed remediation reports, achieving 100% closure within SLA.
- Executed penetration testing including network scanning, enumeration, and exploitation using Nmap, Metasploit, and Burp Suite to simulate real-world attack scenarios.
- Applied threat hunting methodologies and explored security automation opportunities; documented findings in structured playbooks shared across the team.

Cyber Security Intern

Jun 2025 - Oct 2025

Razz Security, Remote

- Performed vulnerability assessments on 5+ web applications, reducing attack surface through actionable risk-rated remediation guidance.
- Identified and documented web application vulnerabilities including SQL Injection, Stored XSS, and Command Injection; collaborated with developers on fixes.
- Authored 10+ security reports summarizing findings and remediation steps; recognized for clear communication and documentation quality.

PROJECTS

Log Monitoring and Incident Response Documentation

Designed log monitoring workflows and incident response playbooks covering 8 attack scenarios, aligned with NIST and SOC best practices.

SIEM Workflow and Threat Monitoring Concepts

Reproduced SIEM alert correlation and threat detection use cases in Splunk; improved detection for 5 common attack patterns including brute force and lateral movement.

Network Security Fundamentals and Security Reporting

Analyzed 1000+ packets using Wireshark; identified anomalous traffic and produced structured security reports with risk-rated findings.

CERTIFICATIONS

- CEH - Certified Ethical Hacker (EC-Council)
- Cyber Security Certification

EDUCATION

B.Com (Computer Applications)

Graduated: May 2021
